

Psychology Curriculum

Your journey at Eastbrook School

Psychology allows you to gain a greater understanding of both the complex and simple nature of humans.

Issues and Debates:
what biases and arguments are there in psychology?

Schizophrenia:
what causes it?
How can it be treated?

What causes gender dysphoria?

Gender: why are boys and girls different?

Why do people commit crime?

Forensics:
how do we catch criminals?

**A-Level
Year 13**

Psychopathology:
how do we define abnormality?

What causes phobias, depression and OCD? How do we treat it?

What are biological rhythms? Why are they important?

How do we study the brain?

Biopsychology: how does the structure of the brain affect our behaviour?

What affect does early attachment have on later relationships?

Attachment: how important is our first relationship?

What affects eyewitness testimony? How can we improve it?

Social influence: Why do people conform?

Why do ordinary people do evil things?

How is it some people can resist social pressure?

Memory:
what is working memory?

Why do we remember some things and forget others?

How does modern psychology explain behaviour?

What did early psychologists believe causes behaviour?

Approaches:
the origins of Psychology

Introduction to Research Methods

**A-Level
Year 12**
