

Dear Student,

Your school is taking part in a study to monitor infection and transmission of coronavirus (COVID-19) in a sample of primary and secondary schools.

Why are we doing this study?

We want to find out how many school pupils and staff have COVID-19 infection how many have already developed antibodies against the virus and how this changes over the course of the year. The information we collect will help inform policies to protect school pupils and staff.

The study is being conducted by Public Health England in partnership with the Office for National Statistics, and the London School of Hygiene and Tropical Medicine, working with the Department for Education and is funded by the Department for Health and Social Care. IQVIA, a healthcare company, are also supporting the study.

What does the study involve?

If you would like to take part, we would like you to complete a consent form and a short questionnaire about you and other household members. Once this is completed, you will be enrolled into the study. The study workers will visit your school once every half term of the current school year to collect a nasal swab and an oral fluid (saliva) sample to test for the virus and antibodies against the virus.

This study is voluntary, you do not have to take part and you can withdraw from any round of testing without giving a reason.

If you register before the **27th January**, a study worker will contact you to arrange for a **Home Antibody Testing Kit** to be sent to you.

How can my child take part?

Complete the steps below, they work best on a computer or tablet, and we are working to improve how the surveys appear on a smartphone:

1. Read the attached information about the study and what it means for you and your family.
2. Go to <https://www.oc-meridian.com/Desktop/Portal/signup?id=cisschools&referralcode=101243> and create an account. You will then receive two emails, one to validate your email address and one to confirm your registration to the study.
3. Please validate your email address by clicking on the link in the sign-up validation email.
4. Login and register, providing consent as required. Your school code is: **101243**
5. Click on 'Home' and complete the enrolment survey.

Please note that for nasal swab virus testing, our priority is to contact participants that test positive for the virus as soon as possible – this will most likely be by telephone. There is no need to contact us to chase a result. We aim to send results of antibody tests to all participants within two months.

If you have any questions, please contact the IQVIA helpline on 0800 917 9679 or email iqvia.schoolinfectionsurvey@nhs.net.

Thank you for contributing to this important study. Your help will inform policies to manage risks of transmission in schools and identify ways to protect children and staff.

Yours faithfully,

Shamez Ladhani
Consultant Epidemiologist
Public Health England
