

Your school needs you!

Join your class on this SIS mission to help keep your friends, family and school safe.

Your mission is to take a simple test. It doesn't hurt and only takes a few minutes.

Every test makes a difference.

Speak to your teacher to join the **SIS Squad** of volunteers.

There are two gentle swabs which don't hurt in these quick tests.

1 Quick nasal swab test

- Taken by students themselves
- A study worker will show you how to do it
- Goes gently in the tip of your nose
- Just takes a few seconds

2 Simple saliva swab

- Taken by students themselves
- A study worker will show you how to do it
- A small soft sponge goes between your gum and teeth
- Its like brushing your teeth
- It only takes 2 minutes
